

NODE

SPECIFICATION DATA

Node tables bring elegance and sophistication to your boardroom or breakout spaces with their sleek, contemporary design. Select from expansive boardroom tables with a half-cone base and integrated cable management, or individual tables featuring a distinctive cone base.

All tables are crafted from robust steel and available in an extended range of frame colours, enabling you to seamlessly complement your existing interior and achieve a cohesive, premium aesthetic.

NODE BASE OPTIONS

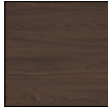

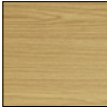

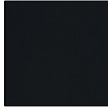

Node individual tables available with four full cone base heights, Coffee, Lounge, Dining and Poseur. Boardroom tables are supplied with two half cone bases and a connecting cable tray. All bases include access doors for easy cable management. This flexible base system allows Node to adapt seamlessly from casual breakout spaces to formal meeting settings.

dome base

NODE STOOL STYLING

Choose between a plain seat pad for a clean, minimalist look or a sewn-border seat pad for added definition, whichever best suits your style and needs.

Plain Top: Dome top with radius top edge

Sewn Border Top: Flat top with 90° edges

ENVIRONMENTAL

Imperial Office Furniture are accredited to both ISO 14001 and the FSC® (Forest Stewardship Council®), and as such has a commitment both to manage its impact on the climate generally, and to source all timber, including MFC, from managed sustainable forests which comply with this internationally recognised forestry standard and where harvesting is controlled as a part of a future sustainability plan.

Being largely manufactured from waste wood, MFC contributes to saving deforestation. Any offcuts created in the production process are returned to stock for use and arrangements are in place onsite for the recycling of large wood wastes, grinded offcuts and dust created by our processes, as well as paper, cardboard, boarding and pallet packaging received with deliveries, in order to minimise our environmental impact. These measures are externally assessed on an annual basis as a part of our ISO 14001 accreditation to ensure ongoing and continuous development and improvement.

FSC® CERTIFICATION

The mark of
responsible forestry

The Forest Stewardship Council® (FSC®) certification certifies organisations and products that adhere to rigorous environmental, social, and economic standards for supporting sustainable forestry management, ensuring responsible sourcing of timber and wood-based materials.

PRODUCT SPECIFICATION

All of the Imperial desking, table and storage ranges comprise multiple width, height and shape options and are combined with extensive leg and accessory options. All items manufactured by Imperial carry a 5 year guarantee.

All timber products are manufactured from MFC (Melamine Faced Chipboard), which is itself manufactured from waste wood that would otherwise have been disposed of and the MFC sourced by Imperial consists of 20% hackchips, 20% sawdust and 40% of other wood recycled materials. It is a practical and low maintenance material for the office environment; scratch, crack, impact and abrasion resistant, colour fast under artificial light and recyclable.

MAINTENANCE

Although resistant to household cleaning products and chemicals, MFC is designed by finish to be low maintenance and requires nothing more than a dust down and wipe clean with warm soapy water. No waxing, de-waxing, polishing or other surface treatment is required.

Regular monthly inspections for any loose fixings, such as screws, nuts, bolts and handles, or for any defects are recommended, especially in moving components such as hinges, runners, castors, locks and doors.

QUALITY & WARRANTY

Imperial products are proudly crafted in the UK using premium, high-quality materials to ensure exceptional durability and longevity. We back our commitment to quality with a comprehensive five-year warranty on all products, providing complete peace of mind for dealers and their clients.

We proudly hold FIRA certification for the exceptional quality of our office furniture, as well as FIRA Gold certification for our professional installation team. These prestigious accreditations underscore our unwavering commitment to excellence, ensuring that every product and service we deliver meets the highest industry standards for safety, durability, and reliability. By adhering to these rigorous benchmarks, we provide our clients with peace of mind, knowing they're investing in solutions that stand the test of time.

Achieving ISO 9001, ISO 14001, and ISO 45001 certifications underscores our commitment to operational excellence. ISO 9001 builds a quality management system for streamlined processes, error reduction, and enhanced customer satisfaction. ISO 14001 promotes environmental responsibility through resource efficiency, waste minimisation, and compliance, cutting costs and boosting reputation. ISO 45001 ensures workplace safety by mitigating risks, preventing accidents, and supporting employee well-being to improve productivity.
